Email : adamcheng.gl@gmail.com

EDUCATION

- **National Taiwan University**

Taipei, Taiwan

B.S. in Computer Science and Information Engineering, Minor in Economics

Expected Jun 2027

- **GPA:** 4.18 / 4.3
- **Coursework (CS):** Game Programming, Machine Learning, Data Structures and Algorithms, Fundamentals of Artificial Intelligence
- **Coursework (Math):** Elementary Analysis, Probability, Statistics, Linear Algebra, Game Theory

PUBLICATIONS

- **CRONOS: Benchmarking Reset-free Reinforcement Learning for Robotic Manipulation** 2026

Po-Yi Wu*, Djengo Cyun-Jyun Fang*, **Dian Cheng**, Tsung-Wei Ke (*Equal contribution) • *Under review*

EXPERIENCE

- **NTU Embodied AI (EAI) Lab**

Taipei, Taiwan

Undergraduate Researcher, advised by Prof. Tsung-Wei Ke

Sep 2025 - Present

- **CRONOS Benchmark:** Contributed to a reset-free multi-task RL simulation benchmark: ran and analyzed experiments, refactored codebase for reproducibility, and built visualization tools.
- **Autonomous Reward Generation:** Designed a multi-agent framework that distills VLM/VGM knowledge into dense reward functions, using keypoint tracking (manual and Molmo-based) on success/failure videos and iterating rewards by comparing their behavior across trajectories.

PROJECTS

- **SoundTrack:** Rhythm dungeon-escape game in Unity/C# (5-person team); designed the project architecture and core data structures, implemented the main game loop and scene flow, and built a prefab-based level/enemy editor that let teammates iterate on levels without touching code. [Demo] [Video]
- **MLB Game Prediction:** Built a model to predict MLB game outcomes for an in-class Kaggle competition, placing 26th of 141 teams (0.590 accuracy vs 0.577 baseline); led data preprocessing and designed ratio-based features to capture relative team strength.
- **6 Nimmt! Game Agent:** Built and compared two agents for a hidden-information card game: an RL agent following the Suphx pipeline (BC → PPO teacher → KL-regularized student), ranked 74th of 284 teams, while an MCTS agent ranked 115th.

LEADERSHIP

- **Co-Chair, 2025 NTU CSIE Camp** (one of three co-chairs; about 60 staff): Designed gamified activities for high-school participants, led playtest reviews and iteration, and built registration and staff forms

PROGRAMMING SKILLS

- **Languages:** Python, C++, C#, R
- **Tools:** Git, Linux, Conda, Unity
- **Prototyping:** Autodesk Fusion (3D modeling), KiCad (PCB design)
